- The tallest point in Florida is only 345 feet.
- Fifteen percent of the people in the United States is of Hispanic origin. People of Hispanic origin may be of any race.
- As new territories were being incorporated, the nation was divided over the issue of states' rights, the role of the federal government, and the expansion of slavery. The Northern states abolished slavery in 1804 and were opposed to the expansion of slavery whereas the Southern states' economy was dependent on slave labor. These issues led to the Civil War, following the secession of the Southern states to form the Confederate States of America after the 1860 election of Abraham Lincoln.
- The median income of households in United States is \$52,000.
- The United States is the world's oldest surviving federation. Its government relies on representative democracy through a congressional system under a set of powers specified by its Constitution.
- Google is actually the common name for a number with a million zeros.
